# PWT

The **Packable Wound Trainer (PWT)** is a ruggedized task trainer with a simulated hemostatic wound. The **PWT** is composed of lifelike synthetic skin and includes a hemostatic wound providing trainees with the ability to execute critical patient treatment such as wound packing and compression training. The PWT functions as a stand-alone skills station during the crawl phase of training.

## KEY BENEFITS

- Realistic wound deep enough to hold a full roll of gauze
- Force sensor to detect proper packing pressure
- LEDs to indicate correct pressure and sufficient hold time
- Can be connected to blood supply
- Responds to direct femoral artery pressure for immediate bleeding control
- Long life 9V battery
- Easy clean-up

## TraumaFX® Multiple Amputation Trauma Trainer (MATT)® Awards
